

## Company Vision:

It is our goal to provide the best independent turbine technical and management support available in the business to our valued clients.

We offer highly competitive rates, highly experienced employees, and a strong network of technical knowledge not generally available within most client organizations to help plan, execute, and optimize turbine generator projects.

We believe that building strong long-term relationships and trust with our clients is critical to our mutual success and contributes greatly to our proven performance and recognized reputation.

## Mission Statement:

We are committed to providing highly experienced and effective technical and management professionals, at a reasonable and competitive cost.

We specialize in power generation gas turbines, steam turbines, generators, turbomachinery, and related rotating equipment disciplines. We are committed to both our clients and our employees to provide win-win, mutually agreeable and sustainable long-term relationships.

## Typical Services Offered:

### Technical:

- Gas Turbine Field Engineer
- Steam Turbine Field Engineer
- Wind Turbine Field Engineer
- Technical Turbomachinery Consultant
- Troubleshooting and Analysis

### Project / Outage management:

- Outage Scheduling
